

But the land is good
a long the lake. There it is
a white sand & gravel toward with
grace and hemlock timber - and
then there is a spruce as they call it
that I call it a marsh spruce
it is rather softer and it then

is a very heavy but not
in its and after you have
the spruce - then the soil is
a sandy loam and black peat
the land beyond is level - and
the lake is perhaps six all by land
but I think been at yet but
the water is very deep and timber

my nation of all a more
day they call clear land which
is better than I would in land
timber land in all country
if the land is light & makes
and it is
